ALORA

People. Systems. Machines.
Manufacturing intelligence turns data into action to drive results

Envision a 15% increase in utilization

Accessing the data tucked away in your machines is the most effective way to transform your business – and it pays for itself. Improving throughput by just 15% can deliver an ROI of $20,000 per machine, per year.*

Empower Your People With Visibility

For many discrete manufacturers, "visibility" is a time-consuming process of sifting through reports, correcting bad data from multiple systems, and even guessing to figure out what is going wrong on the shop floor. Alora changes all that.

Easily integrated with your existing ERP, Alora provides visibility into accurate, actionable data, driving informed decisions from the shop floor to the top floor.

- Accurate, accessible data drives proactive decision making
- Touchscreen operator interface collects data in real time
- Focus management's attention where it has biggest impact
- Configurable, at-a-glance dashboards simplify data and end death-by-report
- Use data to drive action, speed up escalations, refine processes and ultimately, deliver results

ROI in 90 days with full support from our team—rollout to shop floor buy-in

- No new infrastructure needed
- Client success team provides Lean coaching and ramp-up support for faster adoption
- With precise data behind them, estimates and bids are accurate, profitable
- Simple, intuitive apps enable operator engagement
- Drive continuous improvement with a roadmap built on analytics
- Enable the standardization and automation needed to compete in the global marketplace

Ready-to-use templates such as this allow monitoring of machine utilization for jobs, parts, operators or work centers to determine what is driving downtime.

Assumes Average Customer Data: 45% baseline uptime, 16-hour day, $75 shop rate.

DataInventions

Integrate Your Systems and Get More Value from Your Machines

- **Communication with ERP** aligns data end-to-end
- **Centralized data** enables working smarter, not harder
- **Real-time comparisons** of current production vs. forecast helps you adjust before a job is done and it's too late
- **Machine data collection** regardless of machine age, type, brand or connectivity
- **Real-time alerts** with reason code to drive accountability and escalation
- Create **detailed utilization reports** by part, job, operator, program ID, work center, performance
- See **real-time dashboards** on any device, any time

Alora Fast Start Kit Includes:

- **Connectivity hardware** needed for machines including WiFi, wired, or combination
- **ERP Data Adaptor** to automatically connect machine data to jobs, operations, targets, etc., in real time (ERP data collection is required)
- **Productivity and Machine Intelligence Package** includes ready-to-use templates tailored for all levels of the organization plus display and content management
- **Client success team** oversees professional installation, technical implementation, hands-on training and support for full operator adoption
